Eastwood Painting Project

POWERWASHING/WATER RECLAMATION OF
HOURLY GARAGE - BWI GENERAL
CONTRACTOR - SOUTHWAY BUILDERS

(IAN BARNES - 410-332-4134 MES
KRIS CARTER - 410-850-5816)

Specialty work of an environmental nature was accomplished by Eastwood in order to accomplish work needed by BWI in 2005.

Eastwood was called upon as the MBE to accomplish the cleaning of floor surfaces of the hourly garage at BWI.

Due to EPA restraints, no water from the power washing could enter any of the drainage system. Eastwood designed a series of containments using new technology in order to satisfy the environmental restraints, but also a system of cleaning and filtering the water so that it exceeded the parameters of disposable water.

Entering a partnership with Maryland Environmental Services, Eastwood was able to contain, clean and dispose of the waste water which was far beyond the scope of the project, but met the endeavor of a cleaner Maryland as well as protecting the Bay.

TOTAL FOR THIS CONTRACT \$ 533,215.00
