Powerwash cleaning and painting of barrier concrete walls 2003.

Eastwood served as the minority painting contractor for this segment of this SHA project.

We were contracted to paint 627,925 feet of concrete walls on I-95 at various locations. Due to the logistics of traffic, specific traffic maintenance plans as well as mobilization of equipment had to be designed to insure the safety of the crew and the public.

This endeavor coupled with the need to achieve the proper cleaning and coating with the specified mil thickness, while on such busy highways, was the challenges navigated on this project.

Eastwood was able to accomplish all aspects of this projects successfully as well as provide the Owner an excellent finish on all surfaces as well as completing the project on time.
