Eastwood Painting Project

NIH MEDICAL BUILDING - LEAD
REMOVAL & RESTORATION
OF HISTORIC METAL RAILINGS
CONTRACTOR-CHUGACH SUPPORT SERV.

(MATT CALVIN - 301-718-8773)

Eastwood was contracted in 2004 to remove lead based paint and restore the historic railings back to original appearance. On site supervision was by Cindy Zaffiris .

Lead abatement is challenging at anytime, but when it has to be done using chemical strippers on a medically sensitive location, without interfering with the schedules of the offices operating within, making sure that there would be no exposure to any one working in such a public area.

This is accomplished only with good planing and execution that insures a good acceptable result. Eastwood and its trained staff was able to meet and exceed all the parameters of the required specification both from the Owners as well as the State Of Maryland Lead Abatement laws.

TOTAL FOR THIS PROJECT \$ 13,342.00
